

ENVIRONMENTAL POLICY

AMANZI ENGINEERING PROJECTS acknowledges and recognises the right of the current and future generations to an environment that is not harmful to wellbeing of its Citizens.

Our commitment is to continuously improve our environmental performance and to provide a positive contribution to sustainable development. We therefore strive to conduct our operations in such a way that we minimise any potential adverse effects of our activities and products on the community, the environment and ourselves.

Environmental principles

There are two main categories of our environmental policy for which we have assigned principles to guide our progress.

Management systems

We commit ourselves to environmental management systems will ensure that we.

Document, implement and maintain our management systems.

Achieve continuous improvement through the process of risk management, the execution of performance assessments, benchmarking and the implementation of improvement programmes.

Management will review progress on environmental objectives, targets and programmes.

A policy goal is legal compliance with applicable environmental legislation and defined requirements.

Communicate this policy to employees.

Environmental impacts

We measure our performance, continuously improve and promote best practice in our industry.

We commit ourselves to the prevention of pollution.

Management will provide the necessary resources to execute this policy.

Continuously review environmental impacts in order to minimise environmental degradation.

Rehabilitate our construction sites to its natural state on final closure of operations.

We will be active in promoting the conservation of species and ecosystems in the interests of protecting our country's rich biodiversity.

Our Environmental is available to all employees, regulatory authorities and our Clients.
